Twenty-five states of the Union have authorized the Issuance of State bonds for road construction to supplement other funds for the construc ion of State highways now, according to the Highways Green Book for 1921 published by the American Automobile Association, which is just off the press. This pook is conceded by road authorities to be the most complete record of all phases of the road question which has even been attempted. It contains a synopsis of the road laws, expenditures and progress of road work in each of the

The list of states which have voted State bends for highway construction are California, Colorado, Connecticut, Delaware, Idaho, Illinois, Maine, Maryland, Michigan, Minnesota, Montana, Missouri, Nevada, New Jersey, New York, New Mexico, North Carolina, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, West Virginia, Wyomite and Wish. The total amount made available from State and county bond issues for road construction throughout the United States during 1919, 1920 and United States during 1919, 1929 and 1921, as far as the American Automobile Association could ascertain, was in excess of \$900,000,000. It is believed that if all of the issues could have been tabulated the amount would have been tabulated the amount would have been tabulated the amount would have been in excess of \$1,000,000,000. This is in addition to the funds which are derived for road construction by direct taxation, the returns from the motor vehicle tax and Federal aid.

## Commonwealth's Attorney

Subject to Democratic Primary August 2, 1921.

With reference to the Sunday Law, I wish to say that I neither nake the law, nor interpret the law. The Legislature makes the law, and the Courts interpret it. I stand for law-enforcement, whatever the law is, and hold my outh of office to be higher than any other consideration. If a public official cannot be trusted to enforce all the laws, he cannot be trusted to enforce any. If changes in the law are desired, the Legislature can take proper

For six years I have discharged the duties of my office, working a large part of the time day and night, without even the assistance of a stenographer. In that time I have simply made a living for myself and family, and have surrendered more than \$15,000,00 in fees, to the poor and unfortunate. These fees, if I had collected them, would have paid an assistant

If there is any complaint against me, except that I have kept my oath, and done my duty, I have not heard of it.

I submit the following letter, which speaks for itself:

GEORGE E. WICE, Esq.

It gives me great pleasure to say that during the past six rears you have discharged the duties of Commonwealth's Attorney for the City of Richmond, ably, fearlessly, conscientiously and

I write this without the request or suggestion of any one, believing that your faithful services entitle you to this recognition and commendation.

Yours very respectfully,

D. C. RICHARDSON, (Judge of the Hustings Court).

### A Brain Can't Work Right on Thin, Watery Blood

It takes iron to make strong, magnetic, forceful men with the power and energy to win.

Many a capable intelligent man falls just short of success — nearly "gets there" but not quite—simply because he lacks sufficient iron in his blood to give him the physical strength and power to furnish the proper FORCE TO HIS BRAIN and the "STAY THERE" STRENGTH TO HIS "WILL."

THERE ARE 30,000,000,000,000 RED BLOOD CORPUSCLES IN YOUR BLOOD and each one must have iron as iron is absolutely necessary to enable your blood to change food into living cells and tissues and to carry oxygen from your lungs to your brain. Without this your brain cannot do its work right—THINK THE THOUGHTS THAT WIN—any more than a locomotive can pull a big train of cars with a weak, smoldering fire under its boiler.

a big train of cars with a weak, smoldering fire under its boiler.

WHEN YOUR BLOOD IS STARVING FOR IRON no more tonies nor stimulants can put you right. You must have iron. To get iron, you must eat the husks of grains and the peels and skins of truits and vegetables, as our forefathers did, or take a little organic iron from time to time and ett more such iron-containing foods as spinach and appies. But he sure that the iron you take is organic iron and not metallic or mineral iron, which people usually take. Metallic iron is iron just as it comes from the action of strong acids on small pieces of iron, and is, therefore, an entirely different thing from organic iron to granic iron is like the iron in your blood and like the iron in spinach, lentils and appies.
